ANNEXURE C TO THE DIRECTORS' REPORT Management Discussion and Analysis

Overview

The objective of this report is to convey the Management's perspective on the external environment and forging industry, as well as strategy, operating and financial performance, material developments in human resources and industrial relations, risks and opportunities and internal control systems and their adequacy in the Company during the FY 2022-23.

This should be read in conjunctions with the Company's financial statements, the schedules and notes thereto and other information included elsewhere in the Integrated Report. The Company's financial statements have been prepared in accordance with Indian Accounting Standards ('Ind AS') complying with the requirements of the Companies Act, 2013 as amended and regulations issued by the Securities and Exchange Board of India ('SEBI') from time to time

Global Economy

During the calendar year 2022, strong private consumption and investment, greater fiscal support, improved pent-up demand and consumer spending, among others, contributed to the favourable growth globally. On the supply side, easing bottlenecks and lower transportation costs reduced pressures on input prices and allowed for a rebound in previously constrained sectors. Energy markets have adjusted faster than expected to the shock from Russia's invasion of Ukraine.

Global economy is expected to pick up modestly in CY 2023 and 2024 with subsiding inflation and gradual recovery from the effects of Russia-Ukraine crisis. The emerging economies will dominate global economic activity in CY 2023 with their growth estimated to rise modestly from 3.9% in CY 2022 to 4% in CY 2023 and 4.2% in CY 2024. Growth in China is expected to pick up with the reopening of economic activities and rapidly improving mobility in CY 2023. (Source: IMF World Economic Outlook, January 2023).

Indian Economy

The Indian economy has seen a recovery after the damaging impact of the COVID-19 pandemic. However, the global slowdown, geopolitical tensions, stubbornly high inflation, and rising interest rates have posed challenges to faster expansion. As per provisional estimates, India recorded a GDP growth of 7.2% in FY 2022-23 as against 9.1% in FY 2021-22. Growth is estimated to decline to 6.1% in FY 2023-24 before picking up to 6.8% in FY 2024-25 with resilient domestic demand despite external headwinds.

India has shown remarkable resilience to global headwinds in FY 2022-23 and remains in a sweet spot owing to its strong macroeconomic fundamentals. Government initiatives such as Make in India, production-linked incentive (PLI) scheme are expected to boost manufacturing and accelerate economic growth. Along with this, efforts by the Reserve Bank of India (RBI) have led to an improvement in the health of the financial sector and sharply accelerated credit growth driving higher tax collections in a moderate inflation environment. High-frequency indicators such as Goods & Services Tax (GST) collections, manufacturing Purchasing Managers' Index (PMI), pick-up in government spending and private capital expenditure -all indicate healthy economic momentum (Source: IMF World Economic Outlook January 2023, Union Budget 2023-24)

Outlook

The outlook of the Indian economy remains robust. Measures announced in the Union Budget for the next fiscal such as increased capex, focus on infrastructure development, boost to green economy and initiatives for strengthening financial markets are expected to promote job creation and spur economic growth. However, there remains considerable uncertainty due to the challenging global economic conditions. (Source: IMF World Economic Outlook January 2023, Union Budget 2023-24)

Indian Auto Industry

The government's strong push for domestic manufacturing has aided the growth of the Indian automobile industry in FY 2022-23. The year gone by saw India becoming the 3rd largest automobile market after China and US. The Indian automotive industry is expected to sustain its growth momentum in 2023 despite the challenges such as escalating input costs, increased cost of ownership due to regulatory issues and higher inflation which can result in price hike of vehicles.

Factors such as improved consumer demand, wide availability of credit and financing options, population growth, and integration of wireless technology in cars and popularity of EVs are likely to fuel the growth of the automotive industry. Increased capital outlay of ₹10 lakh crore on infrastructure development are also expected to create opportunities for the automotive industry. Government policies such as Make in India, Production Linked Incentive (PLI) scheme, Foreign Trade Policy (FTP) and schemes such as Advance Authorization, and Export Promotion Capital Goods Scheme are expected to boost manufacturing and export of automobiles.

EL FORGE LIMITED

Opportunities & Threats

The government has developed numerous programs to help manufacturers, such as the Production Linked Incentive (PLI) Scheme, which is a cornerstone of the government's endeavour to achieve an Atmanirbhar Bharat • The scheme's goal is to stimulate domestic manufacturing in strategic and emerging areas, improve the cost competitiveness of domestically-made goods, and increase local capacity and economies of scale • Domestic producers are given a preference in the defence sector which will provide new opportunities to the industry .

A faster shift to electric vehicles, will have a impact on our business • Several new companies are entering the market, and existing rivals in adjacent product categories are also increasing their offerings. Under utilisation of the installed capacity resulting in increasing fixed costs of the company, growing cost of key raw materials may impact revenues and profitability of the company.

Risk Management

The Company has a well-devised risk management process aimed at identifying, prioritizing, mitigating and monitoring risks. The key risks impacting its business include economic, foreign exchange, raw material, technology, funding, talent and cyber security risks. The Company has undertaken measures to mitigate these risks.

Commodity Price Risk

The Steel prices have increased substantially during the year and continues to be on the upward spiral. The increases are compensated from customers. Other input costs are also increasing and the company deals with obtaining compensation from customers on a case to case basis.

Financial and Operational Performance:

The Company has undertaken numerous operational initiatives to improve performance and reduce material loss. Undertaken impactful actions to make its quality control process robust and reduce cost of production. We have implemented strict control on raw material purchase and implemented productivity measures, both manpower and machine productivity. Also a number of cost control and cost management measures were initiated during the periods of slowdown this year to improve the financial performance.

Key Financial Ratios:

In accordance with the SEBI (listing Obligations and Disclosure Requirements) Amendment Regulations, 2018 the Company is required to give details of significant changes (changes of 25% or more as compared to immediately previous financial year) in financial ratios are as follows.

Independent Auditor's Report on the Standalone Financial Statements (Continued)

To the Members of El Forge Limited

Annexure-01 of Responsibilities for Audit of Standalone Financial Statement

[Referred in paragraph 08(02) of the aforesaid Report]

As part of an audit in accordance with Standards on Auditing (SAs), I exercise professional judgment and maintain professional skepticism throughout the audit. I also:

01. Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
02. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances.
03. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
04. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in the auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my audit report. However, future events or conditions may cause the Company to cease to continue as a going concern.
05. Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
06. I communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.
07. I also provide those charged with governance with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

12. Management's Responsibility for Internal Financial Controls

The Company's Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India (the "ICAI"). 13. Auditor's Responsibility

- (01) My responsibility is to express an opinion on the Company's internal financial controls with reference to these standalone Ind AS financial statements based on my audit. I conducted my audit in accordance with the Guidance Note and the Standards on Auditing, as specified under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both issued by the ICAI. Those Standards and the Guidance Note require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to these standalone Ind AS financial statements was established and maintained and if such controls operated effectively in all material respects.

Notes No. 3.00, relating to Basic information of the Company & Financial Statements (FS) information

03.02.05. Recent Standards not yet effective and not adopted by the Company

Ministry of Corporate Affairs (“MCA”) notifies new standard or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On March 31, 2023, MCA amended the Companies (Indian Accounting Standards) Rules, 2015 by issuing the Companies (Indian Accounting Standards) Amendment Rules, 2023, applicable from April 1, 2023, as below:

Ind AS 1 – Presentation of Financial Statements

The amendments require companies to disclose their material accounting policies rather than their significant accounting policies. Accounting policy information, together with other information, is material when it can reasonably be expected to influence decisions of primary users of general-purpose financial statements. The Company does not expect this amendment to have any significant impact in its financial statements.

Ind AS 12 – Income Taxes

The amendments clarify how companies account for deferred tax on transactions such as leases and decommissioning obligations. The amendments narrowed the scope of the recognition exemption in paragraphs 15 and 24 of Ind AS 12 (recognition exemption) so that it no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences. The Company does not expect this amendment to have any significant impact in its financial statements.

Ind AS 8 – Accounting Policies, Changes in Accounting Estimates and Errors

The amendments will help entities to distinguish between accounting policies and accounting estimates. The definition of a change in accounting estimates has been replaced with a definition of accounting estimates. Under the new definition, accounting estimates are “monetary amounts in financial statements that are subject to measurement uncertainty”. Entities develop accounting estimates if accounting policies require items in financial statements to be measured in a way that involves measurement uncertainty. The Company does not expect this amendment to have any significant impact in its financial statements.

- 03.02.06. The amendments are extensive and the Company will evaluate the same to give effect to them as required by law.

Significant Accounting Policies

The Company has applied following accounting policies to all periods presented in the Ind AS Financial Statements.

04.01. Revenue Recognition

04.02. Property, Plant and Equipment

4.02.01. Initial Cost

(01) Property, Plant and Equipment is stated at cost less accumulated depreciation and where applicable accumulated impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials, direct labour and any other costs directly attributable to bringing the asset to a working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located. Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment.

(02) When parts of an item of Property, Plant and Equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

(03) Amounts paid as advances towards the acquisition of Property, Plant and Equipment is disclosed separately under other non-current assets as capital advances and the cost of assets not put to use as on Balance Sheet date are disclosed under “Capital work-in-progress”.

4.02.02. Subsequent costs

The cost of replacing part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The carrying amount of the replaced part is de-recognized. The costs of the day-to-day servicing of property, plant and equipment are recognized in the Statement of Profit or Loss.

4.02.03. De-Recognition

Gains and losses on disposal of an item of Property, Plant and Equipment are determined by comparing the proceeds from disposal with the carrying amount of Property, Plant and Equipment and are recognized net within “other income / other expenses” in the Statement of Profit and Loss.

4.02.04. Depreciation

Depreciation is recognized in the Statement of profit and loss on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Company will obtain ownership by the end of the lease term.

04.03. Loans and Borrowings

04.03.01. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the effective interest rate (hereinafter referred as EIR) method. Gains and losses are recognized in statement of profit and loss when the liabilities are derecognized as well as through the EIR amortization process.

04.03.02. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss.

04.04. Borrowing Costs

04.04.01. Borrowing costs are interest and other costs (including exchange difference relating to foreign currency borrowings to the extent that they are regarded as an adjustment to interest costs) incurred in connection with the borrowing of funds. Interest expense is recognized using effective interest method.

04.04.02. Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the cost of that asset. Other borrowing costs are recognized as expenses in the period in which they are incurred. To the extent the Company borrows funds generally and uses them for the purpose of obtaining a qualifying asset, the Company determines the amount of borrowings costs eligible for capitalization by applying a capitalization rate to the expenditure incurred on such asset. The capitalization rate is determined based on the weighted average of borrowing costs applicable to the borrowings of the Company which are outstanding during the period, other than borrowings made specifically towards purchase of the qualifying asset. The amount of borrowing costs that the Company capitalizes during a period does not exceed the amount of borrowing costs incurred during that period.

04.05. Inventories

04.05.01. Inventories are valued at the lower of cost and net realizable value except scrap and by products which are valued at net realizable value. Costs, incurred in bringing the inventory to its present location and conditions, are accounted and considered for valuation. The method of valuation is detailed in the following paragraph.

04.05.02. Raw materials: cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on weighted average basis.

04.05.03. Finished goods and work in progress: Cost includes direct labour and an appropriate share of fixed and variable production overheads. Fixed production overheads are allocated on the basis of normal capacity of production facilities. Cost is determined on moving weighted average basis.

(01) Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

(02) Obsolete inventories are identified and written down to net realizable value. Slow moving and defective inventories are identified and provided to net realizable value.

(03) differences relating to investments in subsidiaries and associates to the extent that it is probable that they will not reverse in the foreseeable future; and

(04) Arising due to taxable temporary differences arising on the initial recognition of goodwill, as the same is not deductible for tax purposes.

04.05.04. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

04.05.05. A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

04.05.06. Deferred taxation arising on investments in subsidiaries and associates is recognized except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred taxation on temporary differences arising out of undistributed earnings of the equity method accounted investee is recorded based on the management's intention. If the intention is to realize the undistributed earnings through sale, deferred tax is measured at the capital gains tax rates that are expected to be applied to temporary differences when they reverse. However, when the intention is to realize the undistributed earnings through dividend, the company's share of the income and expenses of the equity method accounted investee is recorded in the statement of income, after considering any taxes on dividend payable by the equity method accounted investee and no deferred tax is set up in the books as the tax liability is not with the company.

04.06. Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value. For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above.

04.07. Provisions

04.07.01. Provisions are recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect of the time value of money is material, provisions are discounted using a current pre tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

04.07.02. A provision for onerous contract is recognised when the expected benefits to be derived by the Company from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Company recognises any impairment loss on the assets associated with that contract.

04.08. Employee benefit schemes

04.08.01. Short-term employee benefits

Employee benefits payable wholly within twelve months of receiving employee services are classified as short-term employee benefits. These benefits include salaries and wages, performance incentives and compensated absences which are expected to occur in next twelve months. The undiscounted amount of short-term employee benefits to be paid in exchange for employee services is recognized as an expense as the related service is rendered by employees.

04.08.02. Compensated absences:

Compensated absences accruing to employees and which can be carried to future periods but where there are restrictions on availment or encashment or where the availment or encashment is not expected to occur wholly in the next twelve months, the liability on account of the benefit is determined actuarially using the projected unit credit method.

04.08.03. Post-employment benefits

(01) Defined contribution plan

Retirement benefits, in form of superannuation, are a defined contribution scheme. The Company has no obligation, other than the contribution payable to the superannuation fund. The Company recognizes contribution payable to the superannuation scheme as expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to a reduction in future payment or a cash refund.

(02) Defined benefit plans – Gratuity and Provident fund

(a) Gratuity

The Company has a defined benefit plan (the “Gratuity Plan”). The Gratuity Plan provides a lump sum payment to employees who have completed five years or more of service at retirement, disability or termination of employment, being an amount based on the respective employee’s last drawn salary and the number of years of employment with the Company.

Notes to the Ind-AS financial statements for the year ended 31-03-2023, forming an integral part thereof.

Notes No. 4.00, relating to Significant Accounting Policies, forming an integral part thereof

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation. The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets if any. This cost is included in employee benefit expense in the statement of profit and loss. The liability or asset recognised in the balance sheet in respect of gratuity plan is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets if any. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method. Re-measurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income and are never reclassified to profit or loss. Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognised immediately in the statement of profit and loss as past service cost.

(b) Provident Fund

Eligible employees of the Company receive benefits from a provident fund, which is a defined benefit plan. Both the eligible employee and the Company make monthly contributions to the provident fund plan equal to a specified percentage of the covered employee's salary. The Company contributes a portion to the Govt. Provident Fund Trust. The trust invests in specific designated instruments as permitted by Indian law. The remaining portion is contributed to the Government administered pension fund. The rate at which the annual interest is payable to the beneficiaries by the trust is administered by the Government.

(c) Termination benefits

Termination benefits are payable when employment is terminated by the Company before the normal retirement date, or when an employee accepts voluntary redundancy in exchange for these benefits. The Company recognises termination benefits at the earlier of the following dates: (a) when the Company can no longer withdraw the offer of those benefits; and (b) when the Company recognises costs for a restructuring that is within the scope of Ind AS 37 and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting period are discounted to present value.

04.09. Foreign currency transactions

04.09.01. Foreign currency transactions are recorded on initial recognition in the functional currency, using the exchange rate prevailing at the date of transaction.

04.09.03. Foreign currency monetary assets and liabilities denominated in foreign currencies are translated at the functional currency at the exchange rate prevailing at the reporting date.

- (01) Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined.
- (02) Exchange differences arising on settlement or translation of monetary items are recognized as income or expense in the period in which they arise with the exception of exchange differences on gain or loss arising on translation of non-monetary items measured at fair value which is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognized in OCI or profit or loss are also recognized in OCI or profit or loss, respectively).

04.10. Earnings per share

The Company presents basic and diluted earnings per share ("EPS") data for its equity shares. Basic EPS is calculated by dividing the profit and loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the period. Diluted EPS is determined by adjusting the profit and loss attributable to equity shareholders and the weighted average number of equity shares outstanding for the effects of all dilutive potential equity shares.

04.11. Segment Reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. Revenue and expenses are identified to segments on the basis of their relationship to the operating activities of the segment. Inter segment revenue are accounted for based on the cost price. Revenue, expenses, assets and liabilities which are not allocable to segments on a reasonable basis, are included under "Unallocated revenue/ expenses/ assets/ liabilities".

04.12. Leases

At the inception of a lease, the lease arrangement is classified as either a finance lease or an operating lease, based on the substance of the lease arrangement.

04.12.01. Assets taken on finance lease:

A finance lease is recognized as an asset and a liability at the commencement of lease, at lower of the fair value of leased asset or the present value of the minimum lease payments. Initial direct costs, if any, are also capitalized and subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset. Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

04.12.02. Assets taken on operating lease:

- (01) Assets taken on operating leases are not recognized on the Company's Balance Sheet. Payments made under operating leases are recognized in the Statement of Profit and Loss on a straight-line basis over the term of the lease.
- (02) Subsequent to initial recognition, the security deposit is measured at amortized cost using the effective interest method with the carrying amount increased over the lease period up to the refundable amount. The amount of increase in the carrying amount of deposit is recognized as interest income. The lease prepayment is amortized on a straight-line basis over the lease term as lease rental expense.
